SOLAR SHADES

As much as we enjoy sunlight streaming into our homes, it can damage wood floors, artwork, paint, wallpaper, fabrics, and furniture. While Graber Lightweaves Solar Shades appear refined and collected, their efficient fabric is hard at work, quietly multi-tasking to make your environment enjoyable. They minimize glare, reduce optical strain, and block UV rays and heat gain, while still allowing you to see outside. Graber Solar Shades help you create a comfortable, sophisticated sanctuary while preserving your connection to your surroundings.

WORSHIP

THE VIEW

In ancient times, the sun was king.

Today, we prefer to showcase the outdoors while managing light and heat.

◀ Solar Shades with Continuous-Loop Lift: Chronicles, Tuxedo 49204;
Drapery with Reverse Pleats

PERFORMANCE FABRICS

Selecting the right solar shade is about more than looks—how much light comes through is important. Openness percentages tell you how much light and heat filter through, but they also express something more: visibility.

Solar shade fabric is an open weave, allowing a view through the shades. Lower levels of openness—1% and 3%—are more densely woven and more opaque, offering more privacy and blocking more sun and heat. Shades with higher percentages of openness—10% and 14%—have more open space woven in the fabric, allowing a better view outside with less privacy.

1% OPENNESS 3% OPENNESS 5% OPENNESS 10% OPENNESS

DAYLIGHT VIEW, 5% OPENNESS

NIGHTTIME VIEW, 5% OPENNESS

Shade color also impacts your room, as lighter solar shades reflect more heat and light away from your windows, but provide a less-optimal view to the outside. Darker solar fabrics absorb heat, provide better light control, and enhance your daylight view but provide less privacy at night.

Solar Shades with Cordless Lift: Kismet, Vivant 49405 with Contour Valance ▶

REFLECT

ON OPENNESS

Solar openness filters light and heat, and affects how clear your view to the outside is, too.

ROLLER SHADES

REVEL

IN FRESH FABRICS

For satisfying simplicity with a twist of style, roller shades finish your room with modern sensibility in more ways than one.

For an honest, pure approach to decorating your windows, Graber Lightweaves Roller Shades contribute clean lines and quality that never goes out of style. With the fresh perspective of new designer fabrics and textures, you'll turn to roller shades again and again. Under draperies or as a stand-alone statement, roller shades introduce character and common sense into your décor.

◀ Roller Shades with Cordless Lift: Banquet, Helix 14302 with Tassels; Decorative Panels with Grommet Top

OPACITY OPTIONS

Your specifications for privacy and light in each room might fluctuate based on how you and your loved ones use the room. That's why opacity—the degree to which light is blocked by the roller fabric—is a critical consideration, allowing refined, precise control over how much light enters your rooms and how much privacy you have.

SHEER

Allows the most amount of light into the room and provides minimal privacy. Shapes are clearly visible through the shades from the outside.

LIGHT FILTERING

Allows light to gently filter through and provides moderate privacy. Shapes may be visible from outside, but not with detail.

ROOM DARKENING

Allows some light to filter into the room and provides complete privacy. In a lit room at night, shapes may appear as indefinite contours from the outside.

BLACKOUT

Prevents light from shining through and provides maximum privacy. Completely obscures the view from the outside through the shades.

CUSTOMIZE THE LIGHT

Graber Lightweaves Roller Shades fabrics help you build the right ambience.

Left: Light Filtering Roller Shades with Motorized Lift: Harmony, Cityscape 02601 with Cassette Valance

Right: Blackout Roller Shades with Motorized Lift: Whitehall, Wolverine 13902 with Cassette Valance

START WITH A FEELING

Walking into a room is an emotional experience. Your design choices can evoke energy, reflection, calm, or serenity. Drawing on the advantages of textures and structure contributed by other window coverings, your design can achieve a composed, sophisticated status.

CLEAN LINES, CLASSY STYLE

Introduce a foundation that's anything but basic—with heat and glare protection that still preserves your view.

A STATEMENT OF SOLITUDE

Patterned draperies supplement sophistication and grace while providing privacy, light control, and sound suppression.

YOUR GRAND FINALE

A fabric-wrapped cornice, with its strong horizontal focus, is a dramatic counterpart to draperies, finishing your windows with a captivating emphasis on flawless style.

FUSE

TEXTURE AND SHAPE

The unexpected merger of lines, textures, and patterns—even the way they reflect light—creates glamour you'll be proud to exhibit in your home for years to come.

THE BEST OF BOTH WORLDS

Create a sanctuary with premium personalization and control over your light and privacy with Graber Dual Shades.

DUAL SHADES

With two fabrics working together, dual shades allow you filtered light when you want it and privacy when you need it. One tried-and-true combination includes your selection of a gorgeous, patterned roller shade to match your décor and block nighttime views, and a light-filtering solar shade to protect your room from glare during the day. With two fabrics working together, dual shades provide a smart, flexible, stylish window treatment for any room.

◀ Left and Above: Dual Shades with Continuous-Loop Lift: Arboretum BO, Monarch 13702 (top) and Plexus 5%, Travertine 47807 (bottom) with Cassette Valance

EXTERIOR SOLAR SHADES

With Graber Exterior Solar Shades mounted outside your windows, you can block sun from the outside in, or use them to take back your heat-scorched porch, creating a comfortable outdoor space.

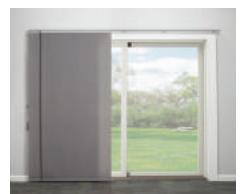

SLIDING PANELS

Graber Sliding Panels, crafted from solar or roller fabric, are custom-fit to your wide windows and patio doors, matching your other window treatments for a cohesive, unified décor.

STACKING OPTIONS

Sliding panels can be stacked to the left, right, or center to best accommodate the design and intended use of a space.

DETAILS

THAT SET YOU APART

The difference between pleasant and impressive décor is often the particulars you might otherwise overlook.

! WARNING/ ADVERTENCIA/ MISE EN GARDE

The cords on this product present a potential strangulation hazard.

Los cordones de este producto representan un peligro potencial de estrangulamiento.

Les câbles de ce produit représentent un danger potentiel de strangulation.

For child safety, consider cordless alternatives or products with inaccessible cords.

Para la seguridad de los niños, utilice alternativas sin cordón o productos cuyos cordones sean inaccesibles.

Pour la sécurité des enfants, pensez au sans fil, ou procurez-vous des produits dont les câbles ne sont pas accessibles.

Ask your Gruber dealer about our cordless control options, which have been certified as Best for Kids by an independent lab.

CONTROL OPTIONS

SMART PULL LIFT

A convenient, easy-glide lift system that uses a single, color-coordinated cord to lift and lower your shade to the perfect spot.

CONTINUOUS-LOOP LIFT

Bead chain-and-clutch system makes raising and lowering shades easy; includes hold-down device that keeps chain taut for safety.

CORDLESS LIFT

Our safest option for homes with children and pets, cordless lift delivers a streamlined appearance with no chains and smooth control, thanks to an exclusive speed braking system.

MOTORIZED LIFT

For the ultimate convenience, safety, and high-tech style, Gruber Virtual Cord™ motorized control allows you to operate hard-to-reach shades, multiple shades at once, and sync with your home automation system for a truly smart home.

CORD CONTROL

Reliable cord control makes opening and closing sliding panels absolutely effortless. Includes hold down device.

WAND CONTROL

Durable clear plastic wand smoothly opens and closes sliding panels.

YOUR SAFETY IS OUR HIGHEST PRIORITY

You have high standards for the products you use to decorate your home. You want them to be strong and durable, of exceptional quality, and as beautiful as they are functional in design.

You also have high standards for the companies who make those products. That's why Gruber is working constantly to improve processes, maximize product benefits, and above all, ensure your safety.

When child-proofing your home it is important to remember that cords on traditional window blinds and shades pose a strangulation hazard, and can cause accidents or injuries to babies and toddlers.

Cordless lift and motorized lift options are both safe alternatives—eliminating the standard cord that could entangle children or pets. For more information on child-safe window treatments review the guidelines below, or talk with your Gruber Design Consultant.

IMPORTANT CORD SAFETY GUIDELINES

The Window Covering Safety Council urges parents and caregivers to check for potential window cord hazards and make the necessary safety updates.

- Install only cordless window coverings in young children's playrooms and sleeping areas.
- Replace or retrofit window blinds, corded shades and draperies manufactured before 2001 with today's safer products.
- Move all cribs, beds, furniture and toys away from windows and window cords, preferably to another wall.
- Keep all window pull cords and inner lift cords out of children's reach. Make sure that tasseled pull cords are short and continuous-loop cords are permanently anchored to the floor or wall. Cord stops should be properly installed and adjusted.
- Lock cords into position whenever horizontal blinds or shades are lowered.

For more information, contact the Window Coverings Safety Council at windowcoverings.org or 1-800-506-4636. You can also find a list of Gruber products that are safer alternatives for children and pets at gruberblinds.com.

TOP TREATMENTS

WOOD CORNICES

Available in several styles and heights, cornices conceal headrails and hardware to add a bold design element to the top of a window.

KEYSTONES

These accents cover splices in valances and cornices, or simply add visual interest. Keystones can be painted or stained in matching or contrasting colors.

WOOD VALANCES

Offered in a variety of styles, coordinating paints, and stains, valances create a dramatic, clean line whether your shade is mounted inside or outside the window frame.

SOFT TOP TREATMENTS

Give your shades drapery-style detail with a fabric valance or distinctive detail with a fabric-wrapped cornice. Available in a variety of styles.
